FOR Release 30th January 2008, 18:00:

BCS Group join as Code Generation 2008 supporting partners

We are pleased to welcome [BCS Software Practice Advancement Group](#) as a supporting partner for Code Generation 2008.

The SPA Group brings together practitioners to share knowledge and experience about best and emerging practices for software development. In particular the group is concerned with good and efficient design, the positioning of new technologies, and the promotion of reflective, inclusive and balanced processes. SPA has evolved from OOPS, the object technology specialist group.

SPA membership is free. The group holds regular free evening meetings in London, Cambridge and Guernsey. SPA also organizes a world-renowned annual conference, specialist seminar series and other events.

[Code Generation 2008](#) brings together industry experts and leading vendors from areas such as model-driven development, software factories and domain-specific languages in a three-day event covering the practical application of code generation tools and technologies.

The event takes place in Cambridge, UK from June 25th-27th 2008. For more information visit the [Code Generation 2008](#) web site.
