FOR Release 31st October 2007, 09:00:

Cambridge Wireless supports Code Generation 2008

Cambridge Wireless have announced their support for next year's [Code Generation 2008](#) conference.

Code Generation 2008 brings together industry experts and leading vendors from areas such as model-driven development, software factories and domain-specific languages in a three-day event covering the practical application of code generation tools and technologies.

“Cambridge Wireless is very pleased to be a part of this unique event. Software plays a key and increasing role in the development of products and applications across the wireless space and this event will allow our members to share experiences and hear from industry experts about the next evolutionary step in programming technology”, said Dr. Soraya Jones, Commercial Director of Cambridge Wireless.

Cambridge Wireless founder members will receive a discount of 20% and associate members will receive a discount of 10% on conference fees when booking opens on February 25th 2008.

Code Generation 2008 takes place in Cambridge, UK from June 25th-27th 2008. For more information visit the [Code Generation 2008](#) web site.
